

Software Engineer / Full Stack Developer with 5+ years of experience building responsive web applications, reusable UI components, RESTful APIs, workflow automation platforms, and cloud-integrated internal systems. Strong background in **JavaScript, TypeScript, React.js, Redux, Node.js, Express.js, MySQL, HTML5, CSS3, SASS, Jest, React Testing Library, Azure Logic Apps, SharePoint, Power Apps, and AWS**. Experienced in enterprise front-end development, full-stack application development, CMS platforms, Agile delivery, and user-focused digital transformation.

EMPLOYMENT

Full time – Software Engineer
Casual – Software Engineer

Magill College Sydney

January 2025 – Present
July 2024 – December 2024

- Designed and built a Power Apps-based digital marking platform that automated and centralised assessment feedback workflows, reducing trainer marking time and manual processing errors by 50%+.
- Designed data-driven screens, validation rules, pre-filled fields, and SharePoint-backed data structures to improve usability, consistency, and processing accuracy.
- Created a bulk email sending system using Azure Logic Apps and Microsoft 365 services to support scalable student and marketing communications with mobile-friendly layouts across desktop and mobile clients.
- Developed e-learning websites and content management systems using SharePoint, providing scalable, cloud-based platforms for seamless user experience and integration with existing systems.
- Maintained and optimised the college’s WordPress website through caching, CDN configuration, backups, and performance improvements.
- Applied AI-assisted development tools, including Claude and ChatGPT, to support code generation, debugging, documentation, and test-case creation, while validating outputs against technical and business requirements.

Internship – Full Stack Developer

Western Sydney University

Feb 2024 – Aug 2024

Contributed to the development of a full-stack work placement platform that helped companies and students search for and manage internship opportunities.

- Designed and developed responsive user interfaces using React.js, JavaScript, HTML5, CSS3, React Router, Tailwind CSS, Material UI, and Bootstrap, improving usability across desktop and mobile devices.
- Developed and maintained server-side applications using Node.js and Express.js, integrating RESTful API endpoints with front-end features.
- Implemented and managed the MySQL database for storing and retrieving company, university staff and student information. Performed CRUD operations efficiently. Developed secure login system, including JWT and bcrypt.
- Collaborated in a 20-person Agile team across front-end, back-end, testing, and stakeholder communication.

Software Developer

FPT Software

Nov 2017 – Dec 2022

- Delivered enterprise front-end solutions for clients across automotive, insurance, and education domains, including AIA, Cox Automotive, and Singapore Polytechnic.
- Developed responsive and reusable UI features using JavaScript, React.js, Redux, HTML5, CSS3, SASS, Bootstrap, Ant Design, Kendo UI, and other modern form libraries.
- Built and optimised CMS widgets and reusable front-end components that became the foundation for large-scale multi-site implementations.
- Supported high-pressure delivery timelines while maintaining code quality, responsiveness, and client expectations.
- Technologies: JavaScript, HTML/CSS, SASS, React.js, Redux, Bootstrap, Ant Design, Kendo UI, React Hook Form, Formik, Redux Form, Redux Saga, React Boilerplate, Jest, React Testing Library, AWS.
- Acted as Front-End Developer, UI Engineer, and Team Lead across multiple projects.
- Worked in Agile Scrum and Kanban teams of 6–20 members, collaborating with product owners, designers, QA engineers, and back-end developers.
- Recognised with “5-Star Service” and “Best Performance Team 2021” awards for outstanding project contribution.

Software Engineer Associate

Terralogic

Aug 2017 – Dec 2017

- Developed, maintained, and enhanced website features based on client requirements.
- Built responsive front-end interfaces using JavaScript, HTML5, CSS3, AngularJS, and Bootstrap.
- Fixed UI defects, improved page layouts, and supported ongoing website maintenance.

EDUCATION

Sydney, Australia
Master of Information and Communications Technology
Ho Chi Minh, Viet Nam
Bachelor of Information and Technology Engineering

Western Sydney University
Ho Chi Minh University of Technology

Mar 2023 – Dec 2024
2012 - 2017
